TABLEAU DASHBOARD PROJECT

Sales Performance Analysis Dashboard

Student Name	Achal Rajkumar Yadav
Roll No.	T055
Class / Batch	TYBScIT
Subject	Data Visualization with Power BI and Tableau
Academic Year	2026-2027

Submitted to: Sumit Tripathi

1. Project Title

Global E-Commerce Sales & Customer Analytics Dashboard using Tableau

2. Objective

The main objective of this project is to create an interactive Tableau dashboard for analyzing global e-commerce sales and customer performance. The dashboard helps users understand sales, profit, quantity, customer segments, product categories, regional performance, payment methods, and time-based sales trends.

3. Project Description

This project uses Tableau to develop an interactive Global E-Commerce Sales & Customer Analytics Dashboard. The dashboard converts raw e-commerce data into meaningful visual information using KPIs, charts, filters, and calculated fields. It allows users to analyze sales and profit based on different product categories, regions, countries, customer segments, products, and time periods. The project helps identify sales patterns, profitable areas, customer behavior, and overall business performance.

4. Dataset Details

Parameter	Details
Dataset Name	Global E-Commerce Sales & Customer Analytics
Source	Kaggle
Number of Records	2000
Number of Fields	15
Date Range	2 January 2023 – 31 December 2025
Countries	20
Regions	5
Customers	1,534 unique customers
Products	40 unique products
Product Categories	4
Customer Segments	3
Payment Methods	4

Important Fields

- **Order_ID**
- **Order_Date**
- **Customer_Name**
- **Customer_Segment**
- **Country**

- **Region**
- **Product_Category**
- **Product_Name**
- **Quantity**
- **Unit_Price**
- **Discount_Percent**
- **Total_Sales**
- **Shipping_Cost**
- **Profit**
- **Payment_Method**

5. Overall Dataset Summary

Your dataset contains:

- **Total Sales: 484,559.34**
- **Total Profit: 158,872.32**
- **Total Quantity Sold: 7,115**
- **Average Sales per Order: 242.28**
- **Average Profit per Order: 79.44**

Product Categories

- **Technology — 567 orders**
- **Office Supplies — 513 orders**
- **Furniture — 507 orders**
- **Clothing & Accessories — 413 orders**

Regions

- **North America — 578 orders**
- **Asia Pacific — 520 orders**
- **Europe — 503 orders**
- **Middle East & Africa — 208 orders**
- **South America — 191 orders**

Customer Segments

- **Corporate**
- **Consumer**

- **Home Office**

Payment Methods

- **Cash on Delivery**
- **Credit Card**
- **PayPal**
- **Bank Transfer**

5. Tools & Technologies Used

- **Tableau Desktop / Tableau Public**
- **CSV Dataset**
- **Data Visualization**
- **Dashboarding**
- **Data Analysis**

6. Tableau Worksheets / Charts

Visualization	Purpose
KPI Cards	Total Sales, Total Profit and Total Quantity
Line Chart	Sales trend over time
Bar Chart	Sales by Product Category
Map / Bar Chart	Sales by Country / Region
Top 10 Products Chart	Identify highest-selling products
Customer Segment Chart	Compare Consumer, Corporate and Home Office
Profit by Category	Compare profitability of categories
Payment Method Chart	Analyze orders by payment method
Interactive Filters	Year, Region, Country, Category, Customer Segment

7. Calculated Fields

The following calculated fields can be used in the Tableau dashboard:

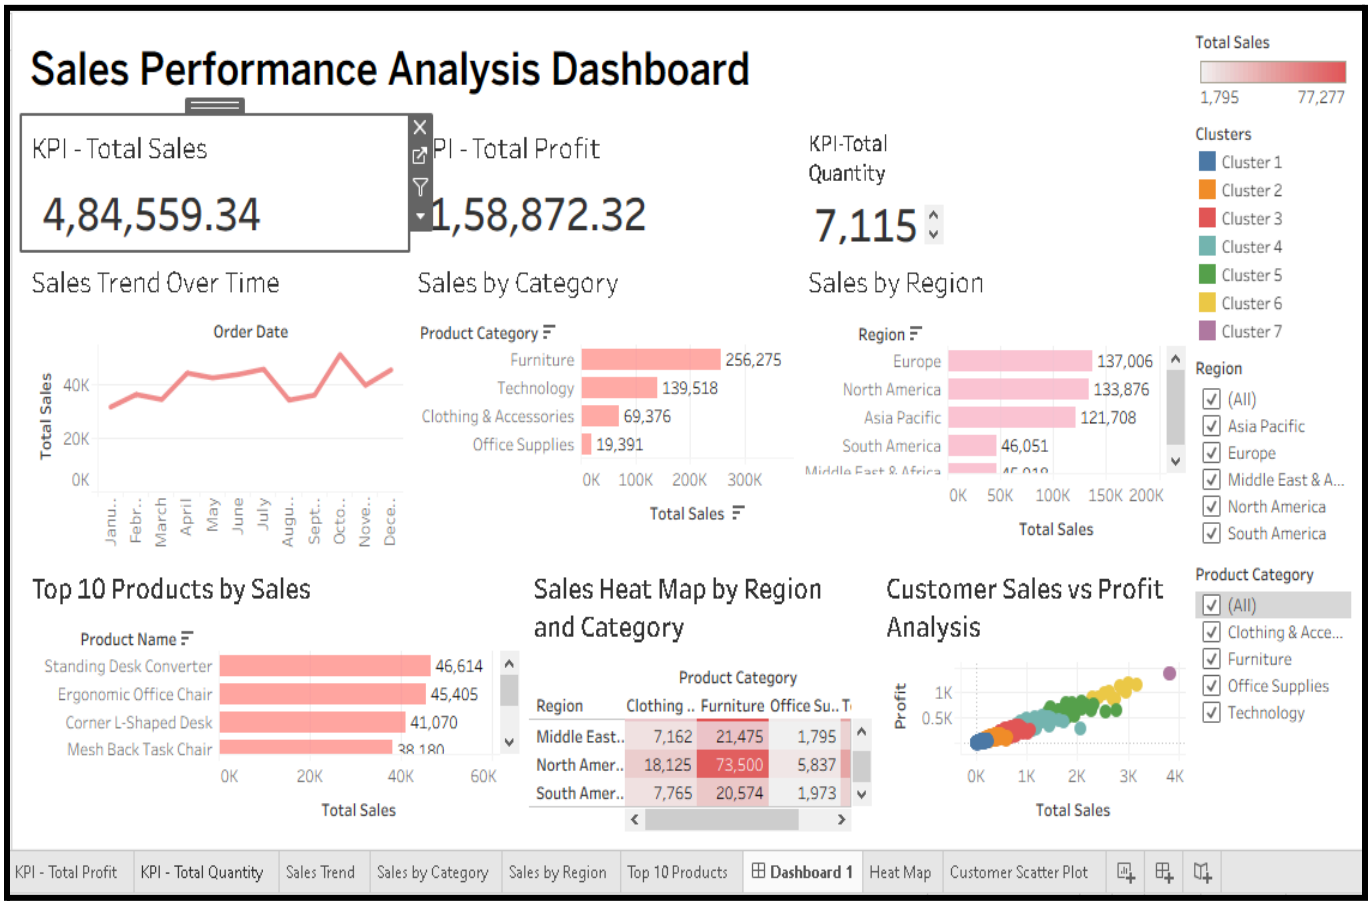

```
Total Sales = SUM([Sales])

Total Profit = SUM([Profit])

Profit Ratio = SUM([Profit]) / SUM([Sales])

Average Sales = AVG([Sales])
```

8. Dashboard Screenshot

9. Key Insights

1. **The dataset contains 2,000 e-commerce orders with total sales of 484,559.34 and total profit of 158,872.32.**
2. **Technology is the largest product category by number of orders, followed by Office Supplies and Furniture.**
3. **North America has the highest number of orders among the five regions, followed by Asia Pacific and Europe.**
4. **The dataset contains three customer segments — Consumer, Corporate, and Home Office — which can be compared to understand customer purchasing behavior.**
5. **The three-year order data from 2023 to 2025 allows the dashboard to identify changes and trends in sales performance over time.**

10. Video Demonstration

Video Link: https://youtu.be/Sr86URGYEOk

The demonstration video explains the:

- Dataset introduction
- Data fields
- Tableau worksheets
- Dashboard design
- KPI cards
- Filters
- Calculated fields
- Major observations and insights

11. GitHub Repository

GitHub Link: _____

Recommended files to upload:

- Tableau workbook (.twb / .twbx)
- Dataset (.csv / .xlsx)
- Dashboard screenshot
- README file
